EDUCATION

Syracuse University, College of Eng & Computer Science Syracuse, NY

Aug 2024 - May 2026

Master of Science, Computer Science

- **Coursework:** Data Structures, Computer Architecture, Design and Analysis of Algorithms, Assured Programming with Formal Methods, Principles of Operating Systems, Social Media & Data Mining

University of Mumbai, Vidyalankar Institute of Technology Mumbai, Maharashtra

Jun 2020 - May 2024

Bachelor of Science, Electronics & Telecommunication

Minors in AI & ML

- **Coursework:** Cloud Computing & Security, Web Design, Control Systems, Database Management Systems, Natural Language Processing, Computer Vision, Probability & Statistics, Deep Learning, Data Science & Analytics

WORK EXPERIENCE

Syracuse University – NEXIS Student Technology Lab

Sep 2025 - Present

Data Science Researcher

Syracuse, NY

- Lead data processing and modeling workflows for large-scale social media datasets using Python, SQL, and Pandas to extract behavioral, linguistic, and engagement insights.
- Oversee ETL workflow redesign to clean and structure 100K+ records, improving model accuracy and reducing preprocessing time by 30 percent.
- Drive statistical analysis and machine learning experimentation including classification, clustering, and feature engineering to advance research on user interaction trends and content behavior.

Syracuse University

May 2025 - Aug 2025

Graduate Research Assistant

Syracuse, NY

- Analyzed 500K+ MLIR log records to pinpoint performance bottlenecks and implemented an automated cleaning pipeline cutting debugging time by 30 percent.
- Partnered with faculty and PhD teams to build dashboards visualizing runtime, memory usage, and scalability trends.
- Coordinated with a cross-functional research group to document workflows and provide open-source MLIR updates adopted by 30+ collaborators.

TIH-IoT - IIT Bombay

Apr 2023 - Jan 2024

Project Fellow

Mumbai, India

- Selected as one of 30 fellows nationwide under the CHANAKYA Fellowship (Govt. of India) and served as a lead contributor on IoT data engineering initiatives.
- Initiated a full data pipeline for real-time sensor ingestion into PostgreSQL, increasing query efficiency by 25 percent.
- Collaborated with IoT research groups to design Power BI dashboards monitoring device performance, anomaly trends, and reliability metrics.
- Led schema optimization for 50K+ IoT activity logs, reducing query execution time by 35 percent through indexing and normalization.

PROJECTS

Sales & Customer Insights Dashboard

Mar 2025 - Jun 2025

- Collaborated with business and analytics peers to design a Power BI dashboard analyzing 100K+ transactions for revenue and customer insights.
- Constructed ETL pipelines in Python (Pandas, NumPy) integrating MySQL + Excel data, decreasing analyst reporting time by 50 percent.
- Delivered insights showing a 12 percent higher repeat-purchase likelihood among loyalty customers, informing retention strategy.

Hospital Readmission Risk Predictor

Oct 2024 - Jan 2025

- Developed predictive models using Scikit-learn and TensorFlow on 50K+ patient records, achieving an F1-score of 0.82.
- Applied SQL-driven feature engineering to extract clinical history, lab results, and demographic attributes from PostgreSQL datasets.
- Generated risk-stratified outputs simulating a 10 percent reduction in avoidable readmissions, supporting enhanced patient-care prioritization.

SKILLS

- **Programming & Data Analysis:** Python, R, SQL (PostgreSQL, MySQL, Oracle), Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, SAS
- **Data Visualization, ML & NLP:** Power BI, Tableau, Excel, Matplotlib, Seaborn, ML Modeling (Regression, Classification, Clustering), Feature Engineering, Model Evaluation (F1, ROC-AUC), TF-IDF, Text Preprocessing
- **Data Engineering, Databases & Cloud:** ETL/ELT, MongoDB, AWS (EC2, S3, RDS), Docker, GitHub Actions, CI/CD, REST APIs, Jira, Confluence

CERTIFICATION

Google Data Analytics Professional Certificate
IBM Data Engineering Professional Certificate
